

Science Communication Training Workshop

March 23rd , 1:00 – 4:00 pm, BSP 103

Effective science communication helps create public support for scientific endeavors via informed decision-making from individuals and government officials. With information and misinformation, so easily and rapidly shared today, effective communication of scientific knowledge is increasingly important

Expert in science demonstration, Professor Ryan D. Baxter, will teach students how to physically perform scientific demonstrations, how to effectively communicate scientific phenomena and how to improvise interactions with students/educators in a performance setting.

Register by scanning the QR code to reserve your coffee and dessert. OR, go to: <https://graduatedivision.ucmerced.edu/form/scientific-communication-workshop>
