# STORY CENTER

LISTEN DEEPLY... TELL STORIES

## THE DIGITAL STORYTELLING WORKSHOP

WITH JOE LAMBERT

StoryCenter evolved a workshop method in the early 1990s, the Digital Storytelling Workshop, that has been adopted by thousands of organizations in education, healthcare, public health, international development and human rights around the world. While based in Berkeley, their national staff, and group of global contractors have taken them to all 50 states and some 62 countries—training and providing services to an array of participatory approaches and workshops in media and story.
